

## NOTICE TO PUBLIC

### The Project

The Lambton Area Water Supply System (LAWSS) has initiated a project to replace the existing Port Lambton standpipe located at 447 West Ward Line, Port Lambton. The project will involve constructing a new standpipe at the existing site, demolishing and removing the existing standpipe, and various site upgrades. A map of the site location is shown below.

### The Process

The planning for this project is following Schedule 'A' activities under the Municipal Class Environmental Assessment (Class EA) document. Schedule 'A' projects are pre-approved pending public notification. The purpose of this public notification is to inform the public of municipal infrastructure projects in their area.

### How to Get Involved

LAWSS invites anyone with an interest in the Project to have an opportunity to provide input. Project information materials will be available online for review beginning August 23, 2021 on the Project website at:

<http://www.lawss.org/port-lambton-standpipe-replacement>

The Project Team wants to hear from you! Comments can be submitted using through the project website until October 4, 2021. Any input received will be maintained on file for use during the project and may be included in project documentation. If you have questions or require further information about this project, please contact either:
