# Port Lambton Standpipe Replacement

## What is the Port Lambton Standpipe?

The Port Lambton Standpipe is a water storage facility located at 447 West Ward Line, Port Lambton. The standpipe provides emergency supply and helps maintain water system pressure.

## Why is the Port Lambton Standpipe being replaced?

The existing standpipe is aging. Construction of a new standpipe and various site upgrades are required to ensure the community's water needs are met.

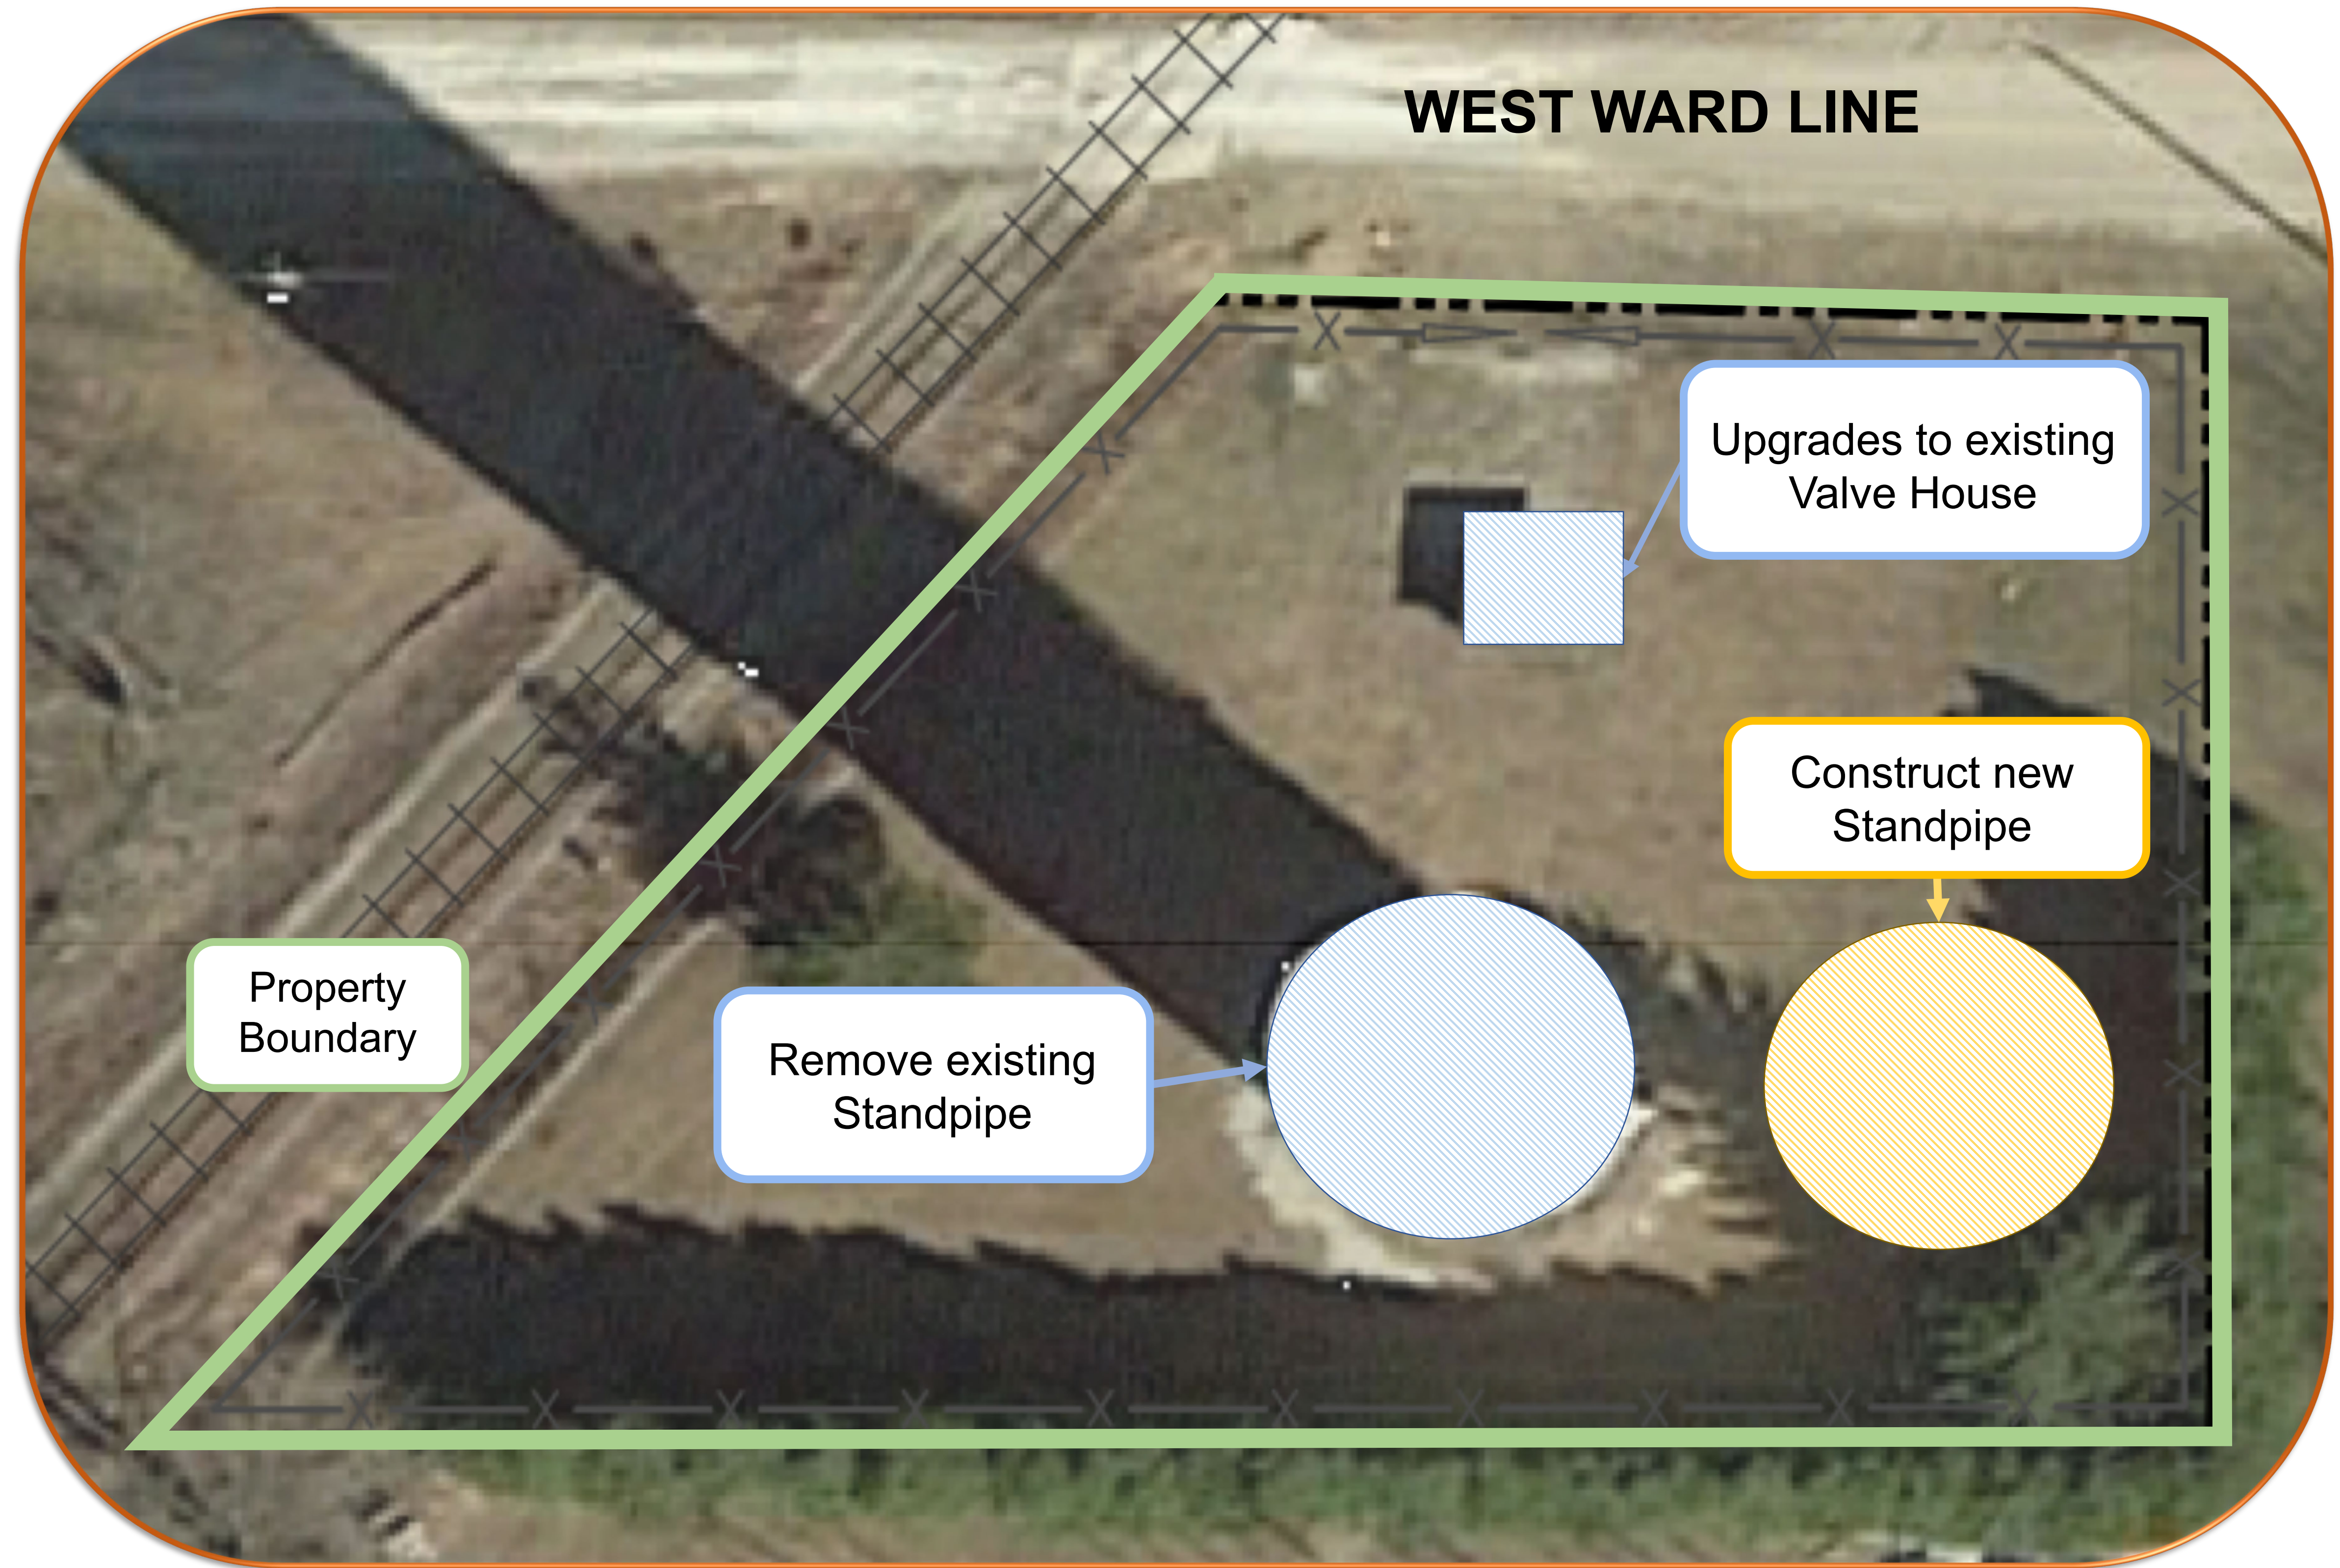

## Purpose of Presentation

The purpose of this public consultation is to tell you about the works that will be performed at the Port Lambton site and the approximate timelines.

## Proposed Works

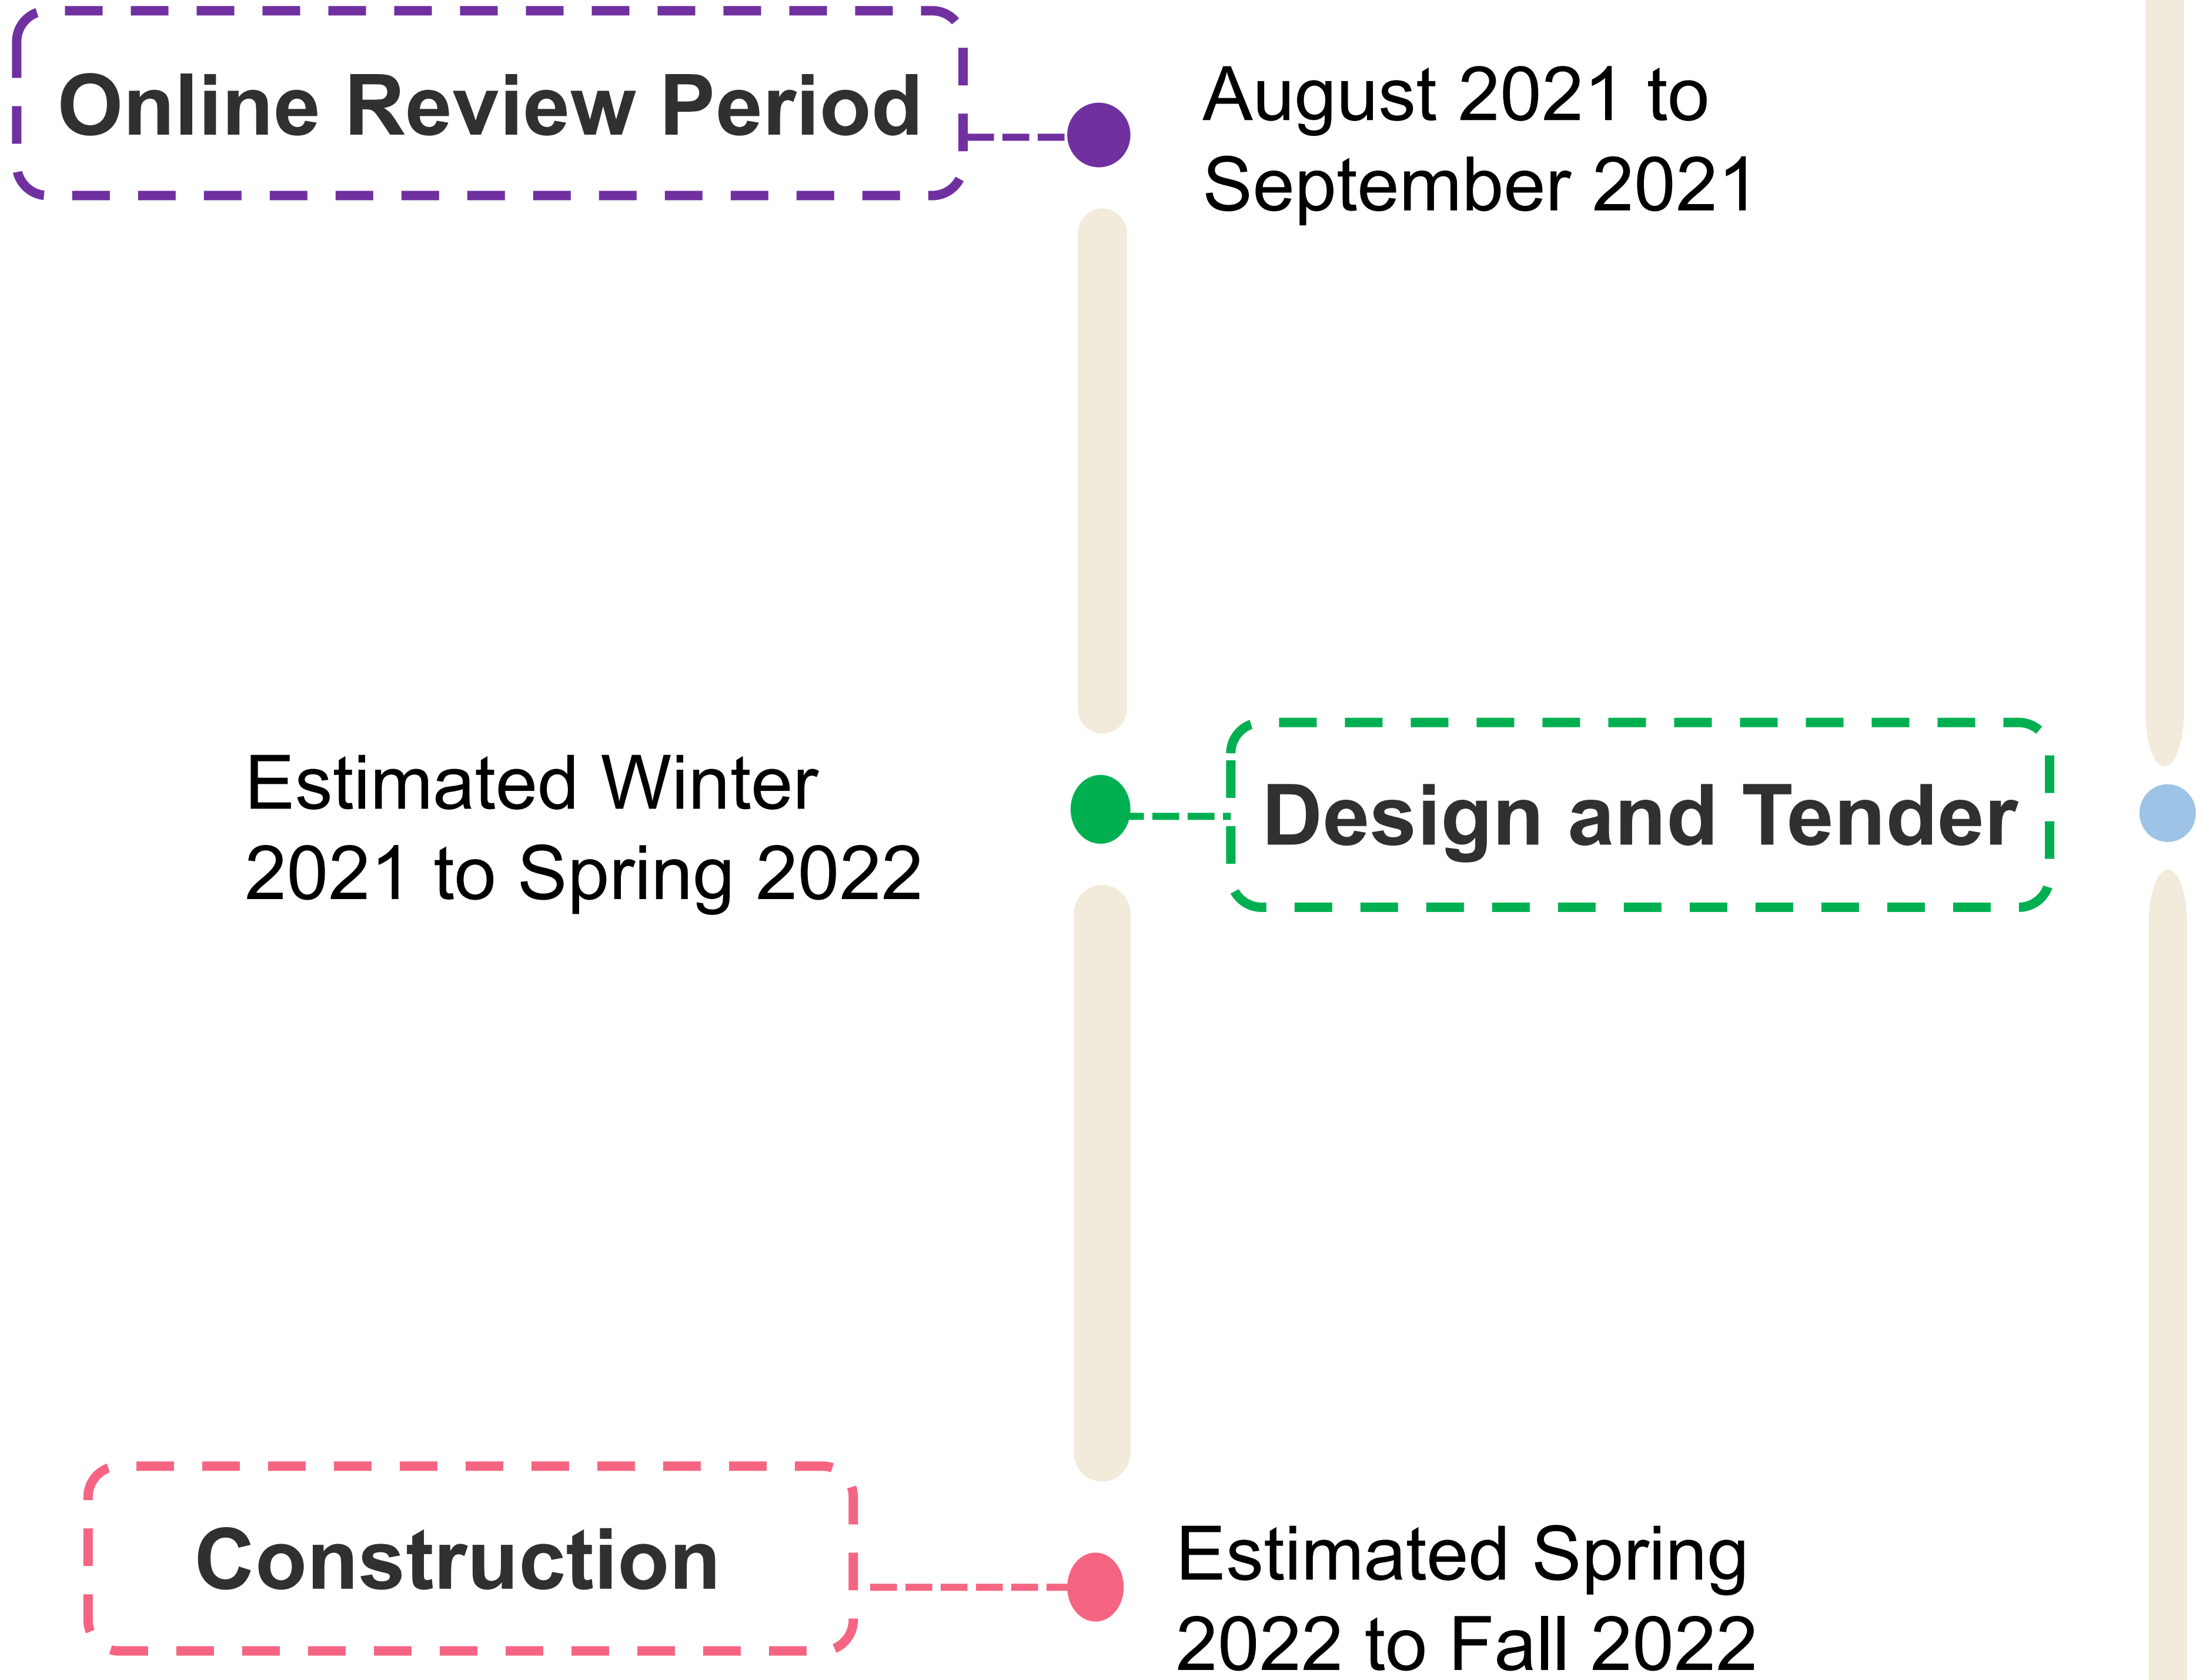

### Features

- All works will occur within existing property boundaries.
- Site access and piping upgrades will also be conducted.
- Existing standpipe will stay online during construction of new standpipe. There will be minimal service disruption.

## Timeline and Next Steps

### How might you be impacted by this project?

- Estimated construction duration: 8 months
- Noise and dust from heavy machinery.
- Once construction is complete, there will be no more dust, noise, or traffic related construction impacts.

### How will we reduce the ways you are impacted?

- Construction work hours will comply with local noise by-laws.

## THANK YOU FOR PARTICIPATING
